

## EleMax™<sup>EXT</sup>: Superior Protection for Detroit Diesel Engines

Cummins Filtration has released a high performance Fleetguard® EleMax<sup>EXT</sup> fuel filter/water separator as an integral part of the technologically advanced DAVCO Fuel Pro® 482 diesel fuel processor. The FS19915 EleMax<sup>EXT</sup> is specifically designed to exceed Detroit Diesel DD13 and DD15 OE fuel system specifications.

The Fuel Pro 482 housing and FS19915 EleMax<sup>EXT</sup> fuel filter/water separator filter combine to provide DD13 and DD15 owners with important features and benefits that ensure peak performance, better protection and longer life for the new engine, including:

- Emulsified fuel/water separation of at least 98% at rated flow via SAE J1488 – even when using B20 diesel fuels – the best fuel system protection for today's common rail fuel system components
- Increased media surface to improve overall capacity and efficiency for longer filter life
- Specific design to meet the fuel system needs of these applications and ensure optimal performance
- Greater than 50,000 mile service interval\*

EleMax<sup>EXT</sup> contains Cummins Filtration's proprietary StrataPore™ multilayer media which adapts to specific application needs for optimum performance and longer life. As with all Fleetguard products, the FS19915 EleMax<sup>EXT</sup> filter is easy to install and maintain with no draining required.

\* While designed and tested in the real world to achieve greater than 50,000 mile service intervals, fuel quality and engine operating conditions can significantly affect filter life, creating the possibility that in certain application environments 50,000 miles may not be achieved.
