

OptiAir™ 500 Series: Secondary Air Filter Design Change

Cummins Filtration has recently redesigned the OptiAir 500 Series Secondary Air Filter with black polymer media support and end caps. The new filter will continue to perform at the same high levels as the previous design. All other features on the air system will remain the same, and the new design will fit into the current OptiAir 500 Series air systems.

Production for the OptiAir 500 Series replacement secondary air filters will begin by December 1, 2009. Existing air housing system part numbers will remain the same. The part number for the new secondary filter is AF26351.

**Previous Part #
AF26166**

**New Part #
AF26351**
